# Purposes of Credentialing for IMRT Clinical Trials

- Education
- Evaluate ability to deliver dose
- Improve understanding of protocol
- Reduce deviation rate

#### **General Credentialing Process**

- Previous patients treated with technique
- Facility Questionnaire
- Knowledge Assessment Questionnaire
- Benchmark case or phantom
- Electronic data submission
- RPC QA & dosimetry review
- Clinical review by radiation oncologist

#### Feedback to Institution

#### IMRT Credentialing

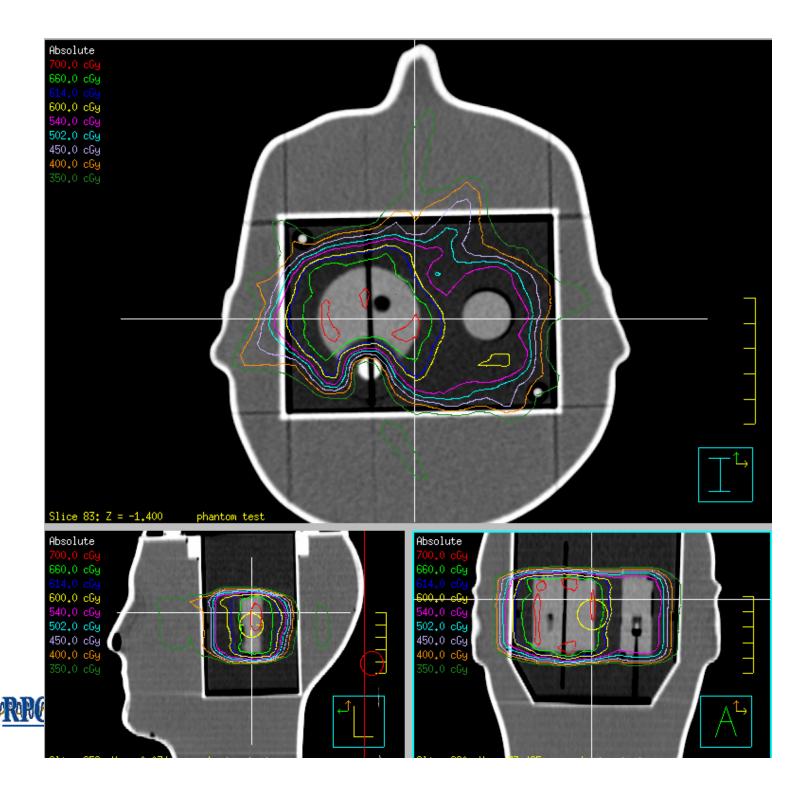

# 400+ institutions have successfully irradiated an RPC IMRT phantom

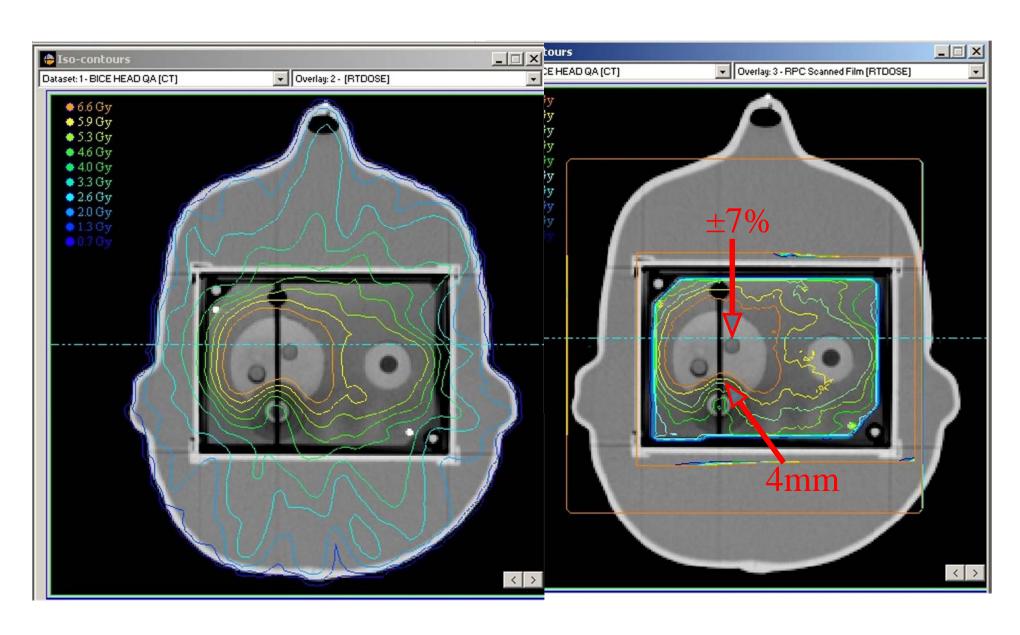

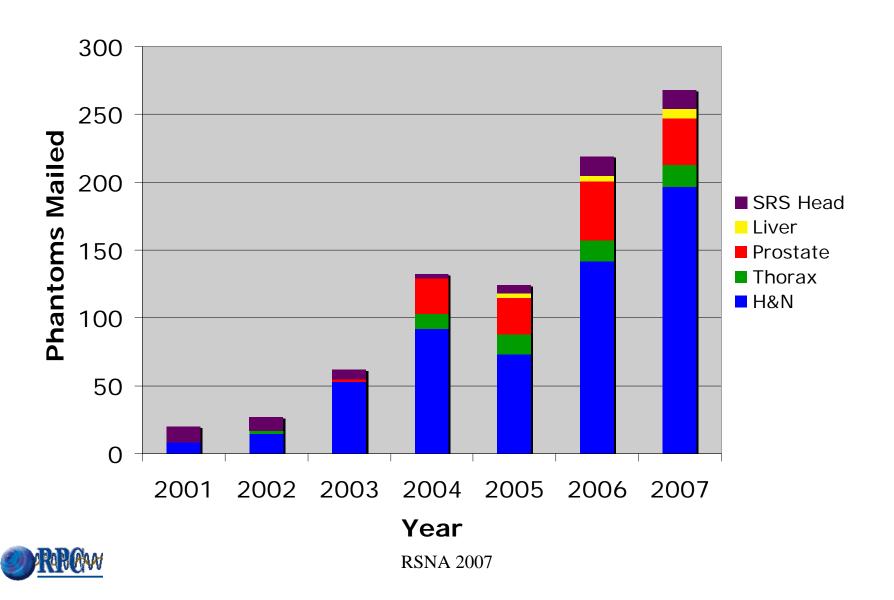

## Plan vs. Treatment

#### Number of phantom mailings

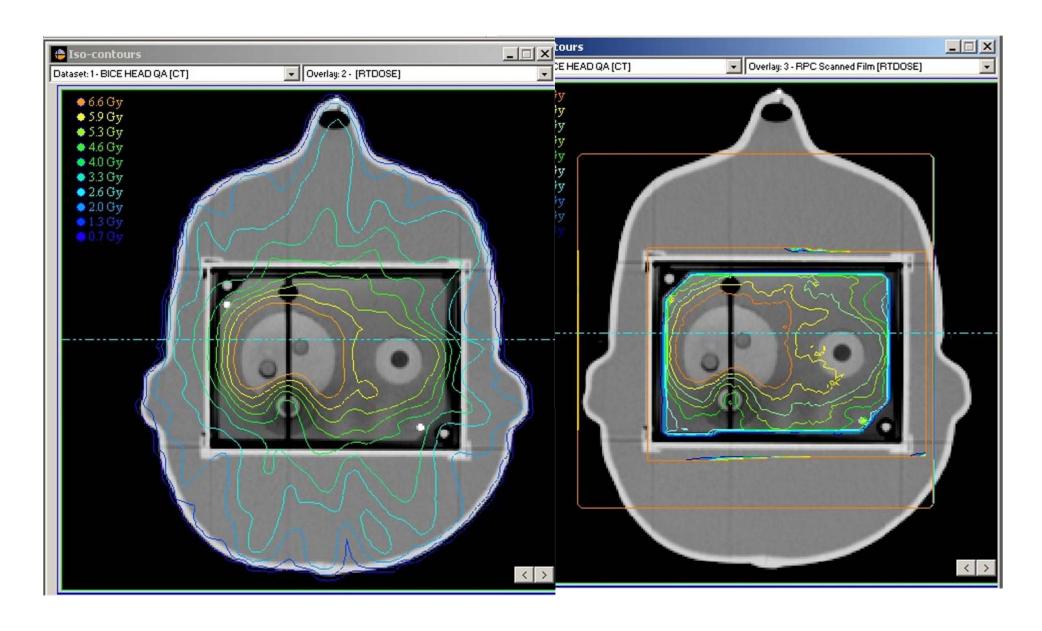

#### **IMRT H&N phantom results**

- 419 irradiations were analyzed
- 322 irradiations passed the criteria
  - 68 institutions irradiated multiple times
- 97 irradiations did not pass the criteria
- 322 institutions are represented

Only 76% of <u>institutions</u> passed the criteria on the first irradiation.

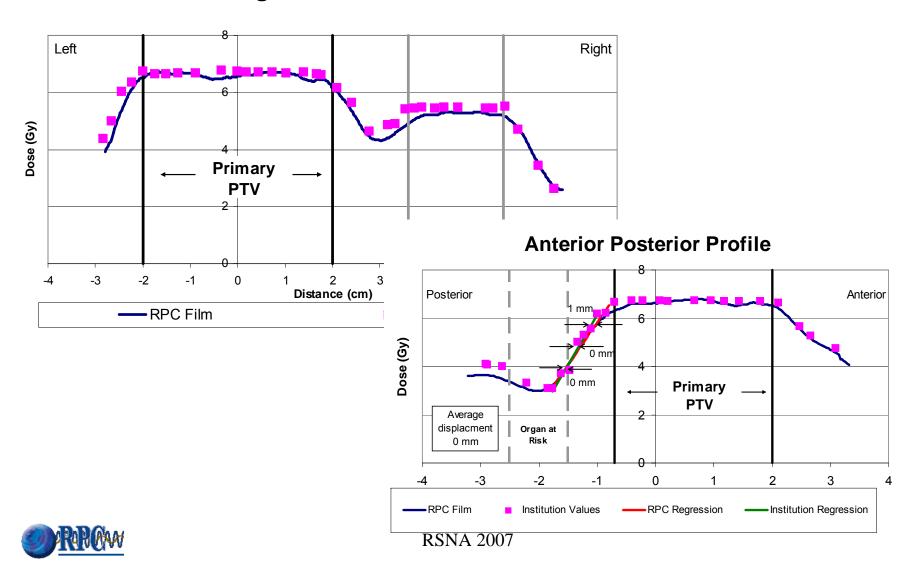

#### Plan vs. Treatment

#### Physicist per machine

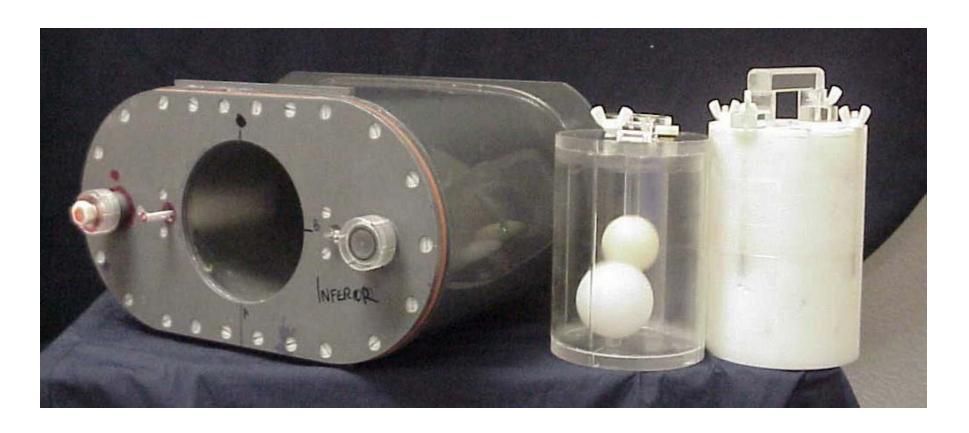

#### **Number of machines**

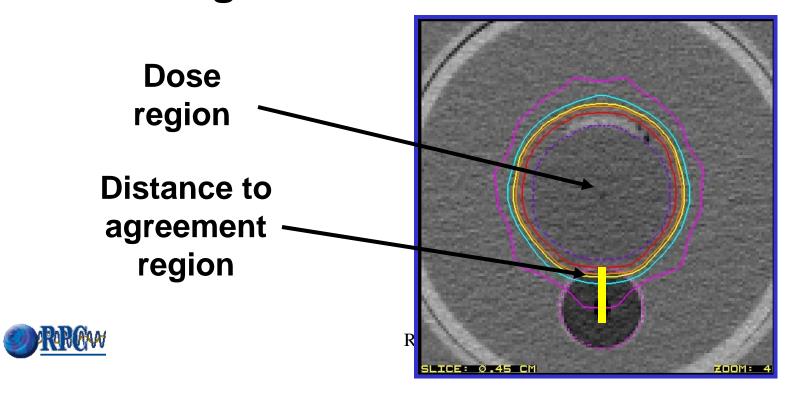

#### **Prostate Phantom**

#### Criteria for credentialing

- RPC/Inst dose in PTV: 0.93-1.07
- distance to agreement in high gradient regions near OARs: ≤ 4 mm

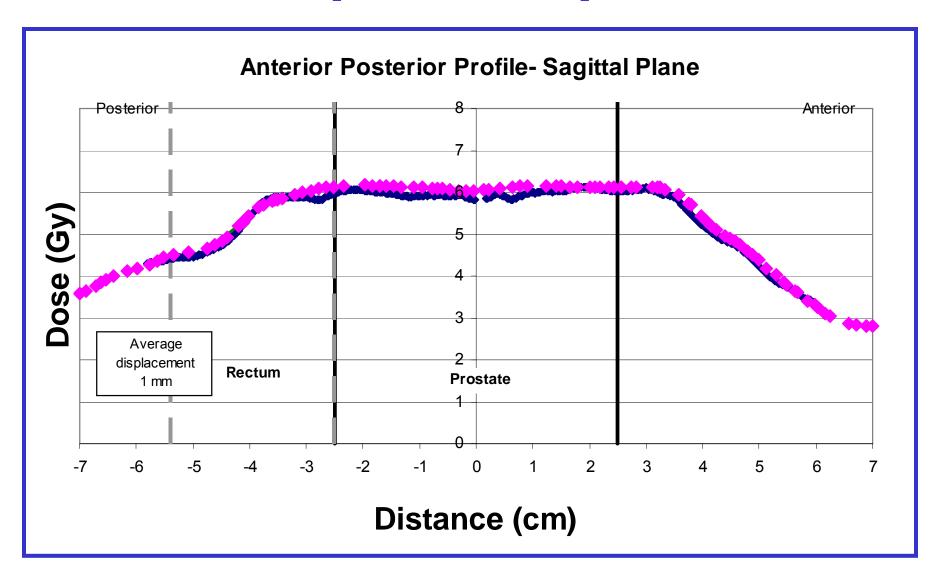

#### IMRT prostate phantom results

- 93 irradiations were analyzed
- 76 irradiations passed the criteria
  - 7 institutions irradiated multiple times
- 17 irradiations did not pass the criteria
- 85 institutions are represented

Only 79% of <u>institutions</u> passed the criteria on the first irradiation.

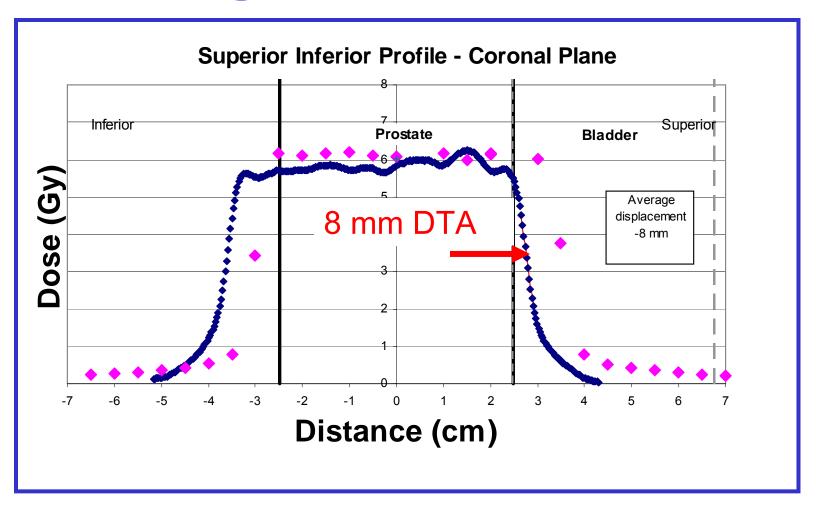

#### Good prostate profile

#### Not so good prostate profile

#### **Explanations for Failures**

Explanation	Minimum # of occurrences
incorrect output factors in TPS	1
incorrect PDD in TPS	1
Software error	1
inadequacies in beam modeling at leaf ends (Cadman, et al; PMB 2002)	14
not adjusting MU to account for dose differences measured with ion chamber	3
errors in couch indexing with Peacock system	3
2 mm tolerence on MLC leaf position	1
setup errors	7
target malfunction	1

#### Conclusions

- The RPC's IMRT phantoms provide a comprehensive evaluation of IMRT for clinical trials
- QA of IMRT is important!

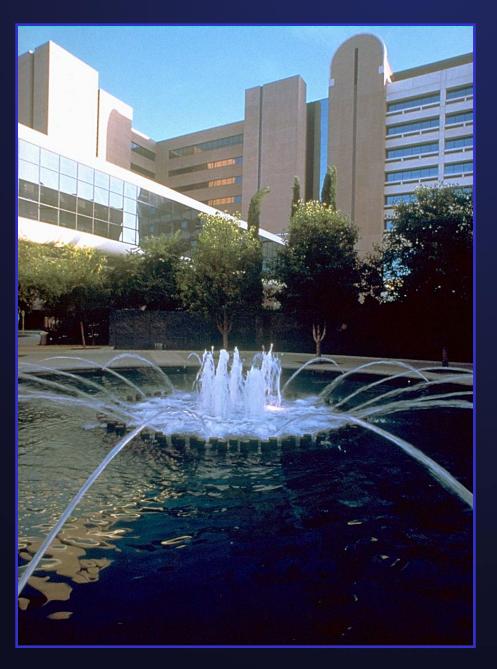

The investigation was supported by PHS grants CA10953 and CA81647 awarded by the NCI, DHHS.
